Tray Lidding Films

TRAY LIDDING FILMS

CRYOVAC® brand lidding films hermetically seal to flexible or rigid plastic trays. Gas flushing creates the desired high and low oxygen modified atmosphere that substantially prolongs the freshness of the product. During refrigerated storage and retail display, our lid films remain fog-free, providing a full view of the product that greatly enhances the merchandising appeal of both fresh and processed food products.

Remain clear under refrigeration with anti-fog technology

Create a tight, wrinkle-free finished product for premium presentation

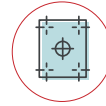

Designed with an oxygen-barrier layer to maintain the desired gas mixture and extend shelf life

Available in barrier adapted to the need of the application

Run on modified atmosphere or standard vacuum packaging equipment

Available in printed and unprinted options

Available with a reclosable feature

CRYOVAC® BRAND LIDDING FILMS FOR FRESH PROTEINS (New Gen Lid)

High barrier and high abuse films which replace thick, non-shrinkable laminates on tray sealers and thermoformers. Designed for fresh red meat, poultry and fish.

CRYOVAC® BRAND MONO-PP TRAY LIDDING FILM (Lid39ZAP)

Film for convenience food market. Designed to seal on mono-PP trays. Suitable for in-pack pasteurization and reheating in microwave ovens. Peels in one piece in hot and cold conditions.

**CRYOVAC® BRAND
RECYCLE-READY* LIDDING FILMS
FOR MONO-PET/RPET TRAYS
(Sealappeal® OSF and PSF)**

Our patented lidding films for ready meals, proteins, and fresh cuts are designed to enhance presentation and consumer experience with a thinner, lighter, anti-fog, film that does not shard. Designed to enhance product presentation and consumer experience. These films are thin, light, anti-fog, and glossy.

** Degree of recyclability of the final package depends on the specific product configuration or components intended for recycling and the scope and availability of appropriate local recycling facilities.*

**CRYOVAC® BRAND RECLOSABLE
TRAY LIDDING FILM
(EOR)**

Medium barrier, reclosable film. The barrier properties make it ideal for extended shelf-life applications requiring controlled permeability such as cheese.

CRYOVAC® BRAND LID830

Thin, high-abuse, anti-fog film for thermoforming and tray lidding applications.

Designed for fish, seafood, fresh red meat, poultry, cheese, smoked and processed meat, ready meals, alternative proteins.

We are in the business to protect,
to solve critical packaging
challenges, and to leave the world
better than we find it.
