

CRYOVAC[®]

BRAND FOOD PACKAGING

CRYOVAC[®] Brand Sealappeal[®] film OSF

Heat treatable, peelable film for
ready meals applications

BENEFITS

Operational Efficiency

- Peelability guaranteed at any sealing temperature
- Good seal strength
- Consistent easy opening with no sharding at temperature 160-170°C
- Allows for relidding during the packaging process
- Longer rolls with the same weight thanks to thinner film

Brand Experience

- Antifog, excellent optics and gloss
- Wrinkle-free, drum effect lid
- No sharding, one-piece peel easy opening features

Product Integrity

- Hermetic, leak-proof pack

CHALLENGE

As a processor you are challenged to offer your customers less processed, added value and easy to cook dishes while balancing the use of plastic to improve your green image. At the same time, you need to differentiate your product on the shelves, since competition is strong.

SOLUTION

CRYOVAC[®] Brand Sealappeal[®] film OSF is a dual-ovenable packaging which will allow you to pack a wide range of nutritionally balanced convenience food and ready meals, including proteins and vegetables. Enhanced pack presentation with perfect product visibility, drum effect and no fog will increase your product's point-of-sale competitiveness. You can enhance efficiencies and gain sustainability benefits from thin PET top web material which maintains perfect peelability and optics properties.

1. Based on results achieved for Sealed Air deliverables.
All facilities and systems are different, so results may vary.

CRYOVAC® Brand Sealappeal® film OSF

SUSTAINABILITY

- Reduced film thickness (from 75 to 35 microns)
- Compatible with PET trays which are easier to identify in the recycling cycles
- Easier trays recycling thanks to no film residue
- Films are produced using materials that are designed and tested to be recycled and compatible with recycling streams for the indicated predominant resin. The degree of recyclability will vary depending on the scope and availability of collection and recycling programs

MATERIAL

Shrinkable, dual ovenable PET material with unique sealing layer designed for tray lidding application offering both easy opening and no sharding.

CRYOVAC® brand Sealappeal® OSF30HZ film is a high barrier film for ready meals. Suitable for sterilisation. Guarantees shelf-life up to 12 months.

EQUIPMENT

Chilled including pasteurized and frozen ovenable ready meals, vegetables and proteins.
