PS 125 OneStep™

Tabletop bagging machine with integrated printer

Designed to bring simplicity, versatility and quality to hand load packaging applications

FEATURES AND BENEFITS

- Ideal for mail order applications, short production runs and build-on-demand operations, offering bag sizes from 50 x 100 mm to 265 x 420 mm.
- Operator-friendly control screen for quick and easy job storage.
- Capable of printing high resolution graphics, text and barcodes directly on the bags.
- Easily change bag sizes in less than 2 minutes.
- All-electric system does not require compressed air to run.
- Open loading area and controlled seal bar for maximum loading flexibility and operator safety.

SPECIFICATIONS

Weight	50 kg
Overall Size	H: 660 mm
	W: 560 mm
	D: 480 mm
Electrical	110/240 VAC, 50/60 Hz, 5.0/2.7 Amps
Pass-through	86 mm
Bag thickness	35-100 µm
Bag widths	55-260 mm
Bag lengths	102-430 mm

TYPICAL APPLICATIONS

Automotive

Electronic

Hardware

Health & Beauty

Home Goods

E-Commerce Packaging

Plumbing

Pet Products

Any application with frequent changeovers in any market

SUSTAINABILITY

As a maker of flexible packaging products, we recognise the need for greater awareness and involvement in creating a more sustainable planet – from the point of manufacture to the point of disposal.

For over a decade, we have been producing environmentally responsible products for our customers. We introduced GeoTech®, a line of pre-consumer reprocessed films that forever changed the packaging industry. We have introduced innovative, lighter gauge films that reduce the amount of material required without compromising packaging performance. In addition, our machinery technology continues to evolve with new, state-of-the-art components and engineering designed to reduce energy consumption.
