

Autobag®

BRAND AUTOMATED SYSTEMS

High Clarity Film - PP

BENEFITS

The High Clarity Film is a multi-layer cast polypropylene material specifically designed for excellent optical properties, seal strength and machinability.

The high transparency and gloss finish of this film makes it ideal for retail packaging, particularly for food applications due to its superior puncture resistance.

This material is available in clear and can be pre-printed in up to 8 colours.

STORAGE

Store in a dry area, temperature should be between 10-30°C. Not to be stored in direct sunlight.

This product is not currently recycled

OPTIONAL FEATURES
