

Sealed Air®

BRAND PROTECTIVE PACKAGING

Paper Mailers With Bubble Cushioning

in our unique PickPack format

More than a pack in
less than a box

As an industry leader, Sealed Air is committed to making an efficient use of natural resources, minimising the impact on the environment without compromising performance. The PickPack format is a smart, clean and easy to use packaging solution, which has been designed to replace corrugated boxes used to ship our paper mailers.

The PickPack format is:

- **Sustainable**
- **Efficient**
- **Easy to use**

It is composed of four cardboard trays overwrapped with shrink film, with an easy-opening tear tape.

SUSTAINABLE

By reducing the packaging weight and volume, we can increase the number of cartons per pallet, improving efficiencies in the logistics area - transport costs are reduced and less warehouse space is required. The PickPack format also reduces the risk of damage and product loss due to wet cartons.

EFFICIENT

Material handling is improved with this easy-to-use packaging, which can also be quickly disassembled and disposed of in the appropriate waste streams.

EASY TO USE

Offers a smart and clean packaging and can be converted easily into a dispenser for both retail and packing areas.

SUSTAINABILITY

LESS IS MORE

The PickPack format uses up to 60% less packaging weight than traditional carton boxes and provides a unique and convenient packaging solution, making an efficient use of natural resources.

REDUCE IMPACT ON THE ENVIRONMENT

Uses less packaging material, reducing the impact of waste on our environment and contributing towards an average of 50% less CO₂ emissions.*

OUR MAILERS ARE A COST EFFECTIVE AND SUSTAINABLE ALTERNATIVE TO CORRUGATED BOXES

Compared to corrugated boxes (which are often used together with void fill material) our protective mailers save time, energy, storage space and typically save over 35% in postal costs.

*refers to the packaging materials used compared to standard Sealed Air boxes, based on the mix of our sales per size

**Degree of recyclability will vary depending on scope and availability of collection, sortation and recycling programs

Our mailers contain a minimum of 60% recycled content. The inner bubble can easily be separated from the outer paper and be reused or recycled in the appropriate waste stream**.

Please note, the colour mix of recycled material used to produce our recycled content bubble cushioning will change from one batch to another. As a result, you may notice variations in shade and colour of the inner bubble lining.

SPECIFICATIONS

The packaging solution is adapted to the different sizes of our mailers.

Mailer No.	Internal Size (nominal)	Mailers/carton
A/000	110 x 160mm	100
B/00	120 x 210mm	100
C/0	150 x 210mm	100
CD	180 x 160mm	100
D/1	180 x 260mm	100
E/2	220 x 260mm	100
F/3	220 x 330mm	50
G/4	240 x 330mm	50
H/5	270 x 360mm	50
J/6	300 x 440mm	50
K/7	350 x 470mm	50

TYPICAL APPLICATIONS

The PickPack format is ideal for e-commerce operations, office customers and retailers.

E-Commerce Packaging

Office Supplies

Omni-Channel Stores

Fulfilment Centre

Mailrooms

Pack & ship stores

Internet-based businesses

Home-based businesses

Retail shipping departments
