

Engineered for product integrity, sustainability, convenience and improved brand experience. Poly mailers contain an external puncture-, tear-, and moisture-resistant proprietary multi-layer film to keep products safe, secure and dry throughout distribution. Ideal for e-commerce businesses needing a fast, easy fulfillment solution, these economical mailers help reduce freight costs and improve labor efficiencies compared to cartons. Our vast assortment of mailers are available with varying degrees of durability and sustainable benefits to fit your unique application needs. Their premium, silk-like surface appearance enhances color printing allowing for enhanced brand opportunities.

MAILER OFFERING

■ NON-CUSHIONED MAILERS

Provides puncture-proof, safe and secure means for shipping durable, non-fragile goods.

■ CUSHIONED MAILERS

Engineered to be tough on the outside, while providing protective cushioning on the inside.

POLY MAILERS

JIFFY® SHURTUFF MAILER

IDEAL FOR: Durable goods that do not require cushioning

Poly mailers are perfect for shipping a wide variety of non-fragile items. Tough but lightweight, they keep products dry, safe, and secure during their journey. Welded, high-strength seams offer maximum capacity for shipping products, eliminating the need for cartons.

JIFFY® TUFFGARD MAILER

IDEAL FOR: Semi-fragile items

Cushioned poly mailers contain an inner layer of our pre-inflated cushioning, helping to ensure the best protection for the contents of the package.

JIFFY® TUFFGARD EXTREME MAILER

IDEAL FOR: Semi-fragile items

Cushioned poly mailers with extreme protection are lined with an inner layer of our pre-inflated jumbo cushioning, delivering the highest-level performance protection.
